## SQUARYDIFFUSOR ${ }^{\circledR}$ <br> dIFFUSION PANEL

## DESCRIPTION

The SQUARYDIFFUSOR ${ }^{\circledR}$ is a diffusion panel that has a higher balance between diffusion/absorption. It is a 2 D quadratic diffuser with five slightly uneven gradients. The SQUARYDIFFUSOR ${ }^{\circledR}$ is made of low-density clay paste.
Due to its quadratic shape and the raw material it uses, its diffusion and absorption features are well balanced for a diffusion panel.
The SQUARYDIFFUSOR ${ }^{\circledR}$ enables quite good control of acoustics by fragmenting the reflected energy, while the absorption factor is not too high, therefore quite recommended for installation in small-sized rooms, by making the acoustics of those spaces quite homogeneous.
This product is also available in individual tiles mainly proposed for big diffusion surfaces, with continuous coating (see more SQAT15); it's an ideal product to the construction market.

## FEATURES

- Manufactured with ceramic.
- Average diffusion: $0.57 / \mathrm{m}^{2}$ [ $>100 \mathrm{~Hz} ;<5 \mathrm{KHz}$ ].
- Fire-resistance: Euroclass A1 (similar to old MO).
- $100 \%$ recyclable.
- Installation: accessories included.

$\square$ ABSORPTION COEFFICIENT: Values in accordance with the standards: EN 20654, ASTM C423 and EN 11654.

- Values $[<100 \mathrm{~Hz}$ and $>5 \mathrm{~K}]$ are Non Standard Values.

DIFFUSION COEFFICIENT: These values were obtained by mathematical calculations and tests carried out in our laboratory.
